DNA CHEMICAL HOUSE (THAILAND) CO., LTD

UV Treatment use UVGI Technology kill bacteria, virus and mold using high doses of Ultraviolet C that natural Technology non-toxic and environmentally friendly because chemicals-free.

Benefit of UV ?

UVGI use UVC wavelength 254 nm. the most effective for kill microorganism by UVC rays attack DNA of microorganism and paralyze all cellular functions and death. It kill germs quickly and effectively.

How UV Application?

UVGI Technology application for Air Treatment, Surface Treatment and Water treatment. The effectiveness is a function of UVC strength and exposure time. The Designing could be high effective, safe and easy.

VIOTECHE "Leader of UV application in Thailand"

Our UV application give advice and finding the right solution for your process.

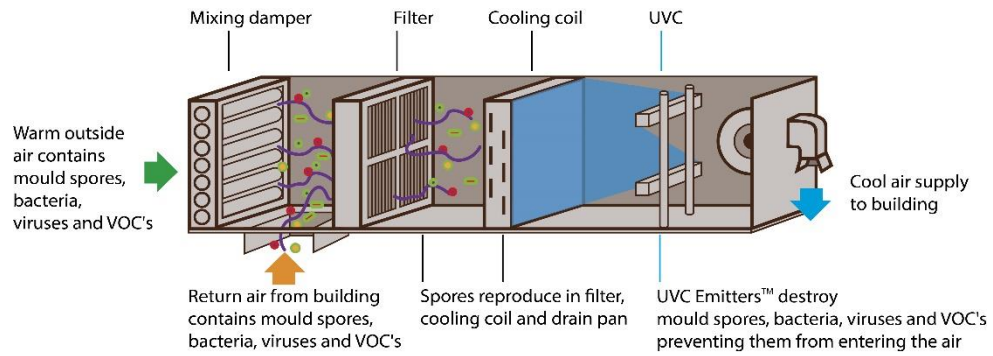

Air Treatment and Cooling Coil Treatment (Specific UV in AHU,HVAC)

Improve air quality with UV treatment system. UV system reduce mold on surface of cooling coil and reduce airborne in air circulate. It's professionally design and calculate to installation for kill microorganism in Air and Surface cooling coil. It eliminate up to 99% of mold in AHU,HVAC system and kill up to 99 % of airborne bacteria passed by the system.

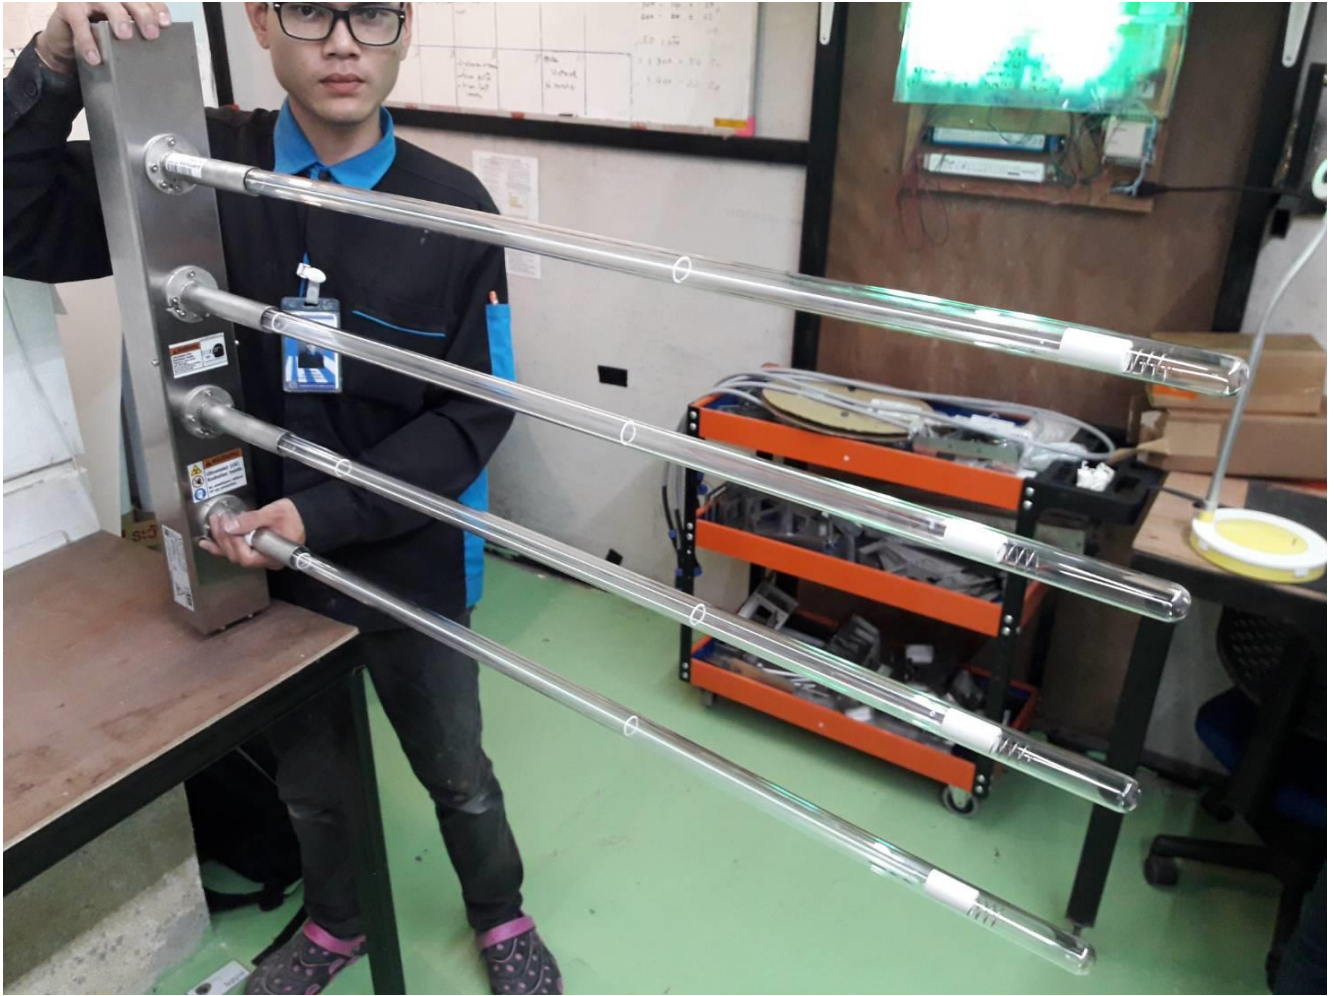

Air treatment – Mold in Air

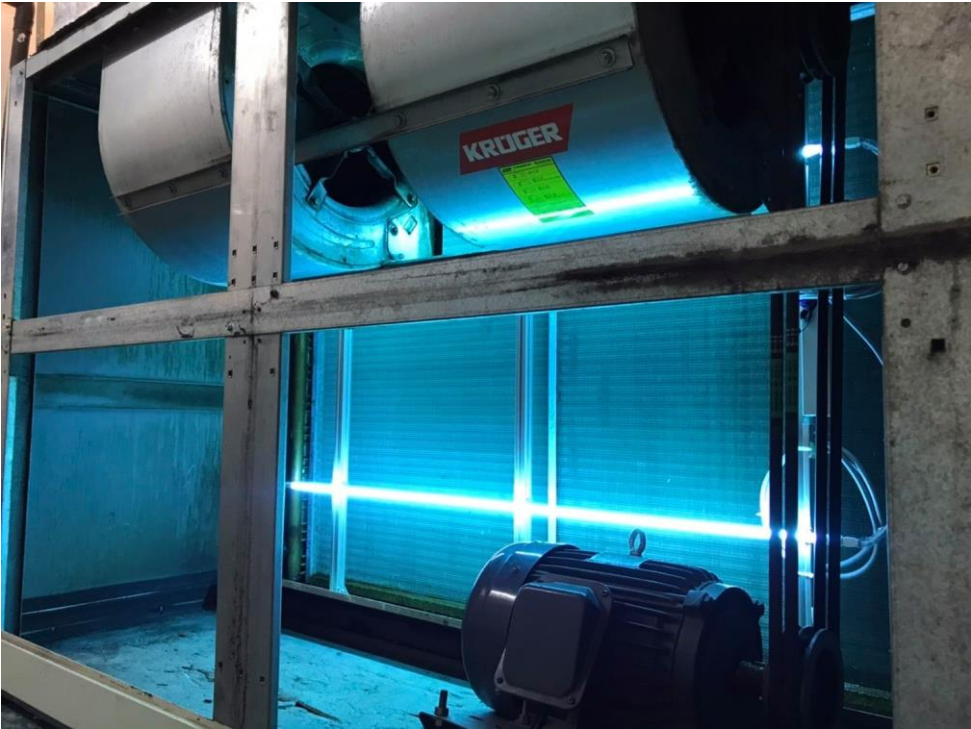

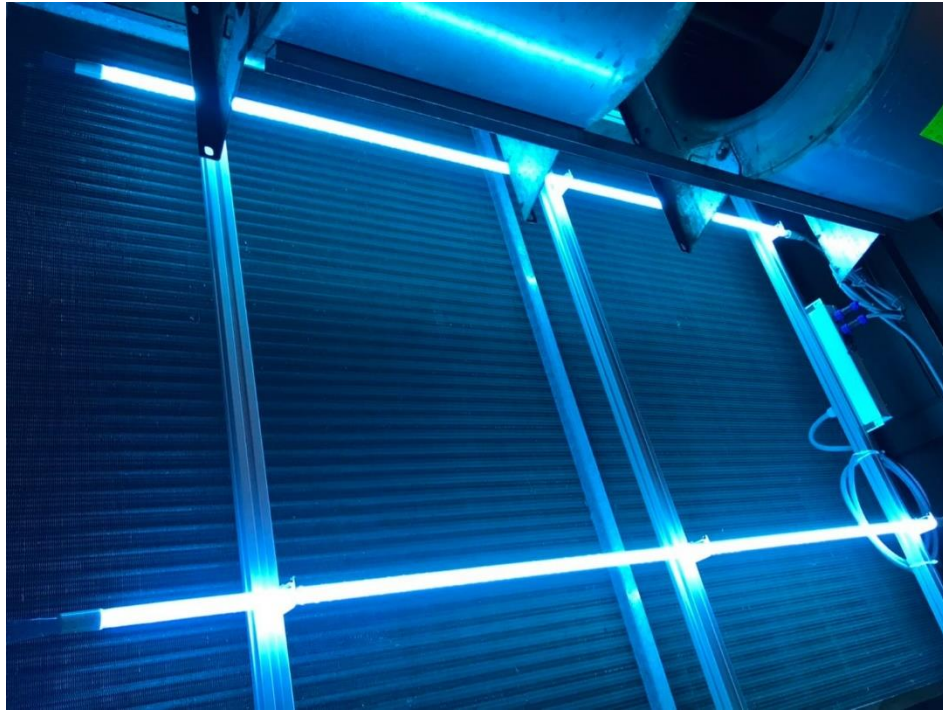

AHU UV System

Titanium Dioxide coating – Cooling coil

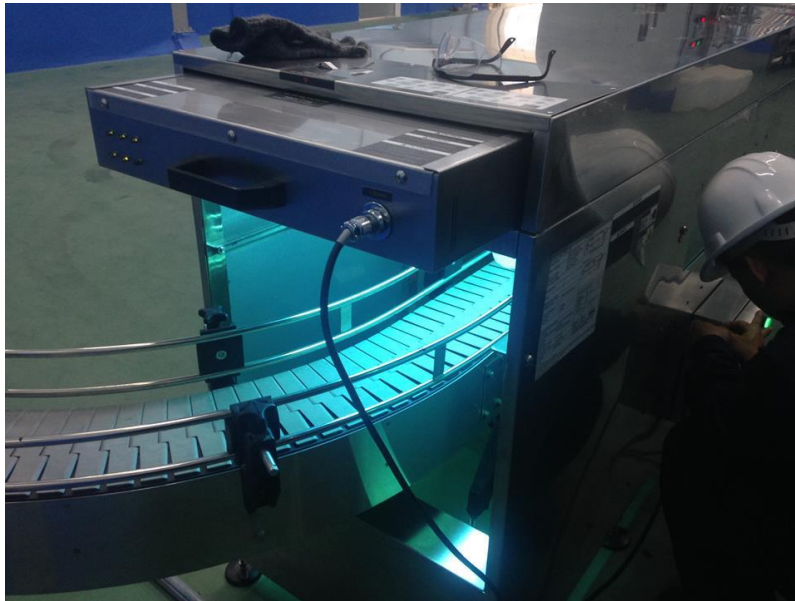

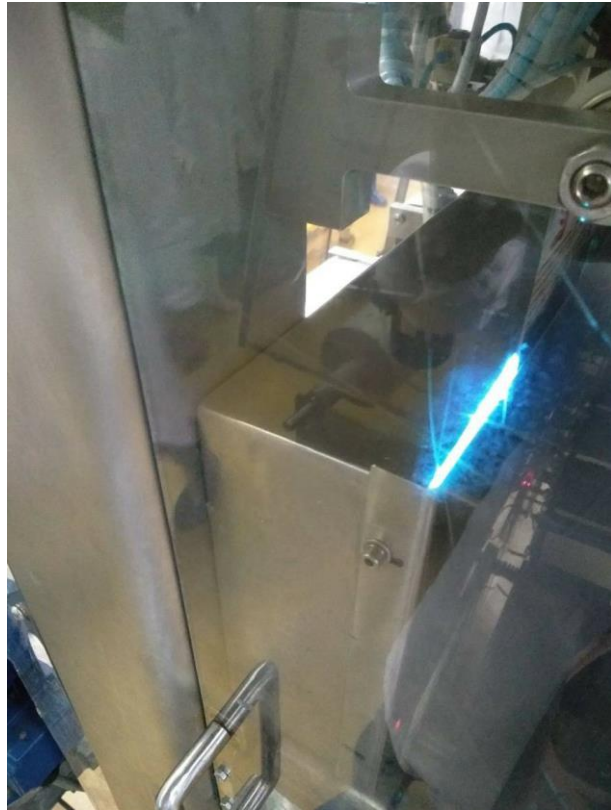

Surface Treatment (UV Tunnel for Packing Treatment and product treatment)

Surface treatment usually use in the Laboratory Room for Room treatment and Surface treatment in cabinet. Industrial usually use UV technology could be application for surface treatment on conveyor line and surface of product also and Kind of Treatment such as fruit , bread , meat , eggs , vegetable ,... etc

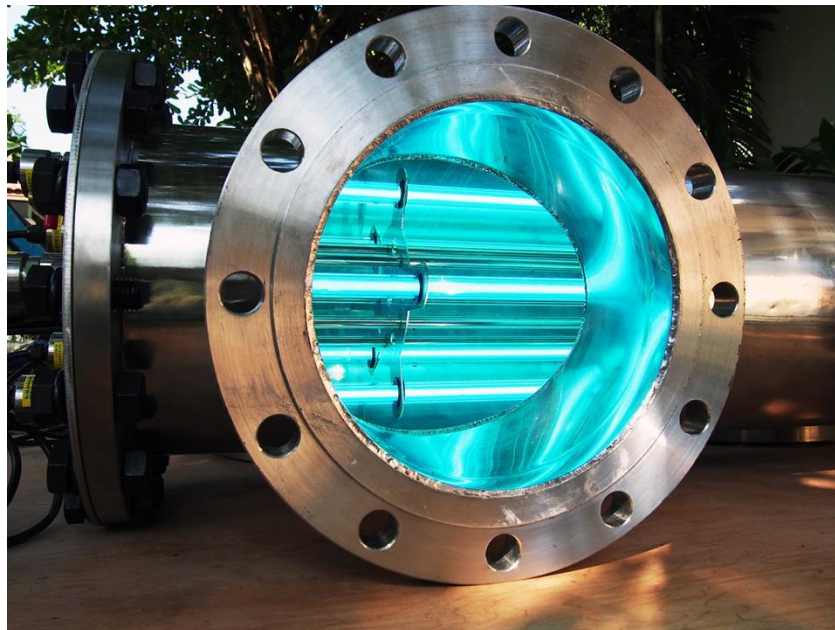

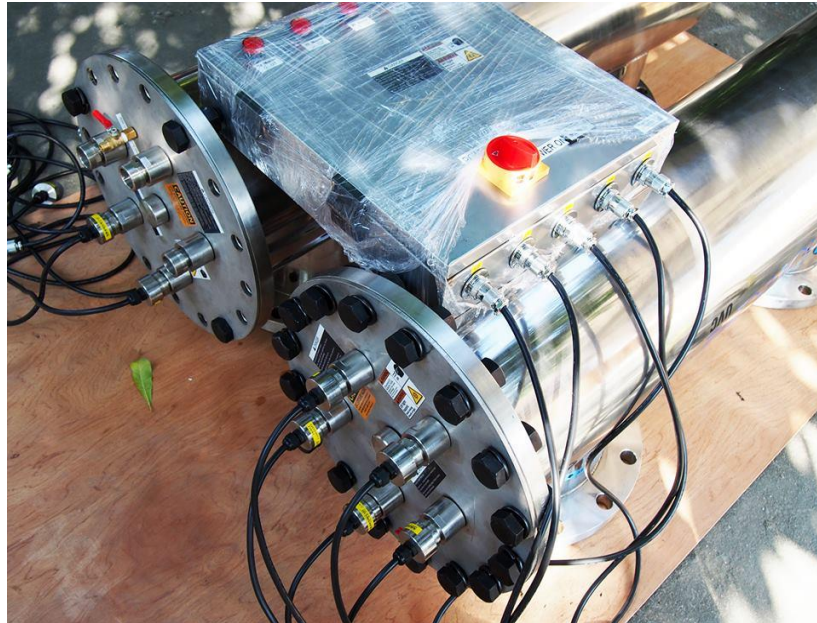

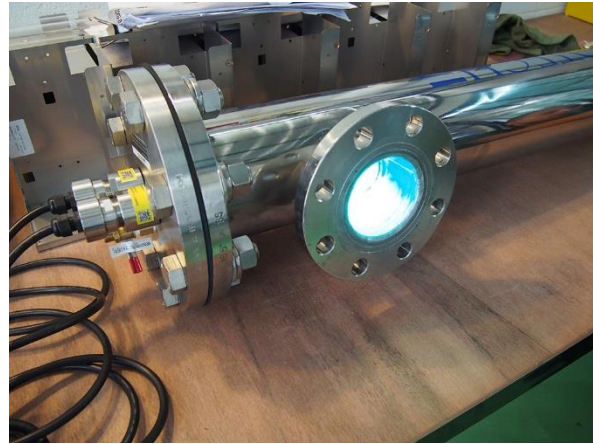

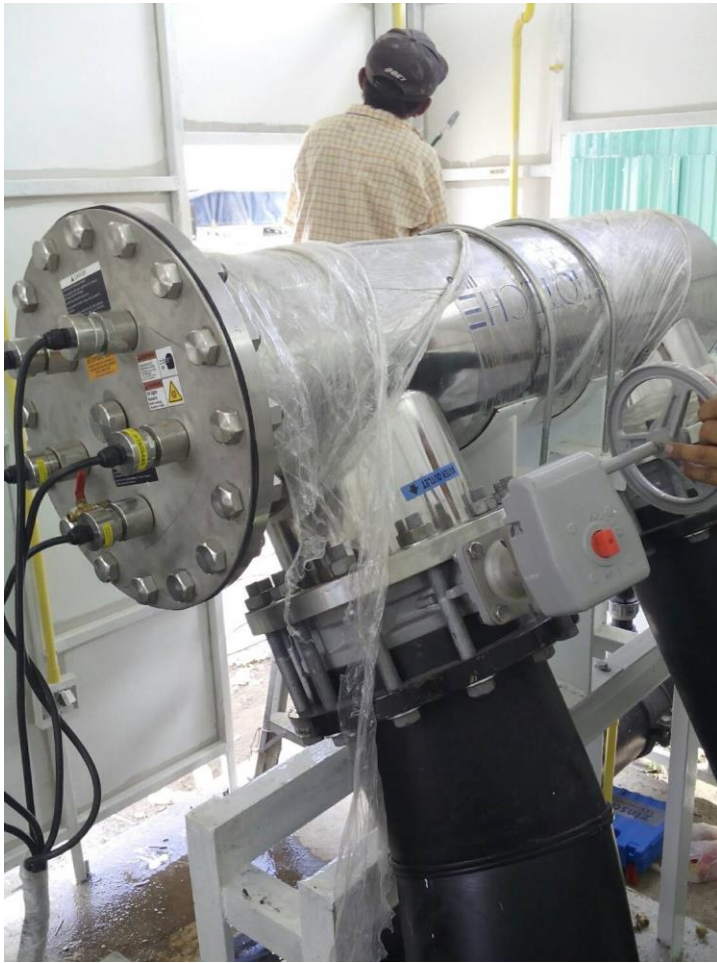

Water Treatment (UV water treatment for Drink water and waste water)

UV treatment use in many water purification systems to control bacteria. UV unit is effective water treatment tools to kill microorganism. Effective of ultraviolet radiation is direct related to the UV dose applied to the water.

VIOTECHE UV Application (Specific UV treatment Customize for Research ,Product and Customization)

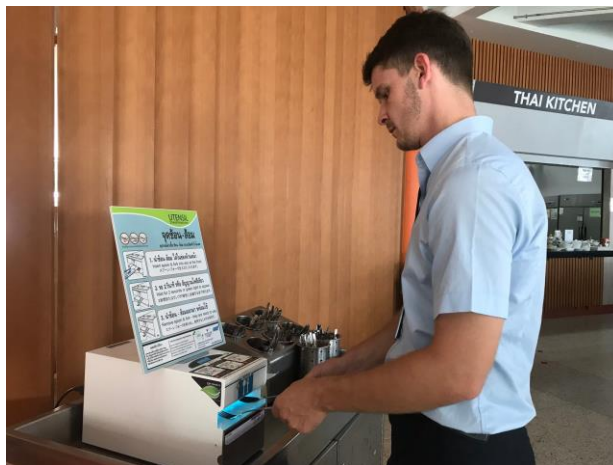

Hospital Applications – Surface and Air Disinfection

Product - Vioteche

Room - Disinfection

UV Fixture Room Treatment
